Subject: Proposal for Organizing a 1-Day Startups Workshop, Setting Up Two Partnership Startups in Collaboration with Startup Karnataka, and Providing Maintenance Support for One Year

1. Introduction and Objectives

Lextria Research, a Manipal-based organization specializing in entrepreneurship development and legal compliance, is honored to propose a streamlined initiative to foster entrepreneurial growth at the Department of Computer Science and Entrepreneurship, Dayananda Sagar University

(DSU). Represented by Adv. Pranav Bhat, we aim to deliver a 1-day startups workshop, establish two partnership-based startups in collaboration with Startup Karnataka, and provide maintenance and compliance support for one year, targeting a cumulative turnover of up to ₹1 Lakh. The entire setup process will be executed within 2 weeks, with ongoing support for 12 months, at a total cost of ₹80,000.

Objectives:

- Equip students and faculty with practical skills in startup ideation, validation, and execution.
- Establish two partnership startups, leveraging Startup Karnataka's ecosystem for mentorship and funding guidance.
- Ensure compliance and financial sustainability for one year, achieving a modest turnover of up to ₹1 Lakh.

This initiative will empower DSU's community to transform innovative ideas into viable ventures, strengthening the university's position as a hub for innovation and entrepreneurship.

2. Scope of Work

The project is structured into three components, each designed to deliver measurable outcomes within a condensed timeline. Below, we present the details in a tabular format, followed by explanations to clarify the scope and execution plan.

a. 1-Day Startups Workshop

Aspect	**Details**
Duration	8 hours
Venue	DSU, Department of Computer Science and Entrepreneurship
Audience	20–30 participants (students, faculty, aspiring entrepreneurs)
Content	- *Morning*: Startup fundamentals, idea generation, market research, business model canvas - *Afternoon*: Prototyping, pitching, legal basics; group exercises for startup ideas

	- *Guest Speakers*: Mentors from Startup Karnataka (subject to availability)
Outcomes	Two startup ideas for partnership formation
Logistics	Lextria Research provides coordination, materials; DSU provides venue, AV equipment, refreshments

Explanation: The workshop is designed to be intensive and interactive, covering the entrepreneurial process from ideation to pitching. The morning session focuses on theoretical foundations and market analysis, while the afternoon emphasizes hands-on activities, including prototyping and pitch development. Guest speakers from Startup Karnataka will enhance credibility and provide real-world insights. The outcome—two viable startup ideas—will serve as the foundation for the partnerships to be established. Lextria Research will manage all facilitation, ensuring DSU's role is limited to providing infrastructure.

b. Setting Up Two Partnership Startups

Aspect	**Details**
Collaboration	Register as partnerships under Startup Karnataka for mentorship, funding guidance
Process	- Select two ideas from workshop/department - Due diligence: Legal vetting, feasibility checks - Register partnerships: Draft deeds, obtain PAN, file with authorities
Timeline	Within 2 weeks (Days 5–15)

Explanation: The two selected startup ideas will be registered as partnership firms under the Startup Karnataka framework, ensuring access to mentorship, networking, and potential funding opportunities. Lextria Research, led by Adv. Pranav Bhat, will conduct due diligence to verify the legal and financial viability of the ideas and founders. The registration process involves drafting partnership deeds, obtaining PAN, and filing with relevant authorities, all completed within a tight 10 to 15 days window to meet the 2-week timeline.

c. Maintenance and Compliance for One Year

Aspect	**Details**
Duration	12 months from registration
Activities	- *Compliance*: Monthly, quarterly, annual filings (e.g., income tax, partnership returns) - *Financial Oversight*: Monitor for ₹1 Lakh turnover via freelance projects, prototype sales - *Certifications*: Obtain CA turnover certificate - *Support*: Quarterly reviews, mentorship, troubleshooting
Metrics	Revenue, compliance adherence, startup sustainability

Explanation: Post-registration, Lextria Research will provide comprehensive support to ensure the startups remain compliant and operational. This includes managing tax filings and other regulatory requirements, monitoring revenue streams (e.g., through small-scale projects or grants), and securing a turnover certificate from a Chartered Accountant. Quarterly reviews and mentorship will address operational challenges, ensuring the startups achieve the target turnover and remain sustainable.

3. Methodology and Timeline

The project is designed for rapid execution, with the setup phase completed in 2 weeks and maintenance extending for 12 months.

Phase	**Activities**	**Timeline**
Preparation	Coordinate workshop, select participants, scout ideas	Days 1–3
Workshop Execution	Conduct 1-day workshop	Day 4
Startup Setup	Due diligence, partnership registration	Days 5–10
Initial Compliance	File initial returns, setup monitoring	Days 11–14

Maintenance	Compliance, financial oversight, support	Months 1–12

Explanation: The timeline is structured to ensure efficiency. Days 1–3 focus on logistics and idea scouting, with the workshop on Day 4 generating startup ideas. Days 5–10 are dedicated to legal and registration processes, leveraging Lextria Research's expertise in compliance. Days 11–14 finalize initial filings and establish monitoring mechanisms. The subsequent 12 months involve ongoing support to meet compliance and turnover goals, with regular check-ins to track progress.

4. Budget Breakdown

The total cost of ₹80,000 is exclusive of all taxes and expenses, allocated as follows:

Item	**Description**	**Amount (₹)**
Workshop Facilitation	Trainer fees, materials, coordination	8,000
Startup Incorporation	Due diligence, partnership deeds, PAN, registrations	50,000
Compliance and Maintenance	Monthly/quarterly/annual filings for 1 year	14,000
CA Certification	Turnover certificate, financial audits	5,000
Miscellaneous	Travel, printing, contingencies	3,000
Sub Total		**80,000**
GST		**14,400**
Grand Total		**94,400**

Payment Terms: 50% advance upon approval, 50% post-setup (Day 14).

Explanation: The budget reflects a cost-effective approach, with the bulk allocated to startup incorporation due to the intensive legal and registration processes. Workshop facilitation is kept lean to maximize resources for

startup setup. Compliance and maintenance costs cover a year of filings and support, while CA certification ensures credibility of the turnover achieved. Miscellaneous expenses account for unforeseen costs, ensuring no budget overruns.

5. Conclusion

Lextria Research, through Adv. Pranav Bhat's expertise, is committed to delivering this project with precision and efficiency. The 2-week setup timeline, coupled with a year of maintenance, ensures rapid yet sustainable outcomes. We are confident this initiative will position DSU as a leader in entrepreneurial education. For further discussion, please contact Adv. Pranav Bhat at +9035685434 or pranavbhat@lextria.in.

Sincerely,
Adv. Pranav Bhat, Lead Consultant

ANNEXURE: ADVANTAGES OF PARTNERSHIP FIRMS

Aspect	Partnership Firms	LLP/Private Limited
Formation	Simple partnership deed, minimal documentation	Complex incorporation, RoC filings
Compliance	Fewer requirements, no mandatory audits unless high turnover	Mandatory annual RoC filings, statutory audits
Cost	Low setup/maintenance costs	Higher costs for setup, compliance
Flexibility	Easy amendments to partnership deed	Rigid processes for changes
Taxation	Taxed at firm level, no dividend tax	Dividend distribution tax for Pvt. Ltd.

Explanation: Partnership firms are ideal for this project due to their simplicity and cost-effectiveness. They require minimal documentation for formation, making them suitable for the 2-week timeline. Compliance is straightforward, with no mandatory audits for small-scale operations, reducing costs. The flexibility to amend partnership deeds allows quick adjustments, while tax benefits avoid additional burdens like dividend taxes, aligning with the project's budget and goals.
