To,

Hon. Director, Academic Leadership Team, TAPMI

Subject: Proposal for collaboration as Guest Faculty — Practical Modules in Techno-Legal & Techno-Commercial Law

Brief Introduction & Intent

I am writing to express my interest in contributing as a guest faculty member at TAPMI in the areas of intellectual property, technology law, and techno-commercial strategy. My work has allowed me to support many startups and businesses in IP enablement, compliance, corporate labour laws and funding, and I would be glad to share practical perspectives and case studies with TAPMI students.

Experience & Areas of Contribution

- Academic background: BE (Electronics & Communication), LLB, certification in International IP law (NLU Delhi), MBA (Finance, completing), ongoing PhD research (AI applications for GI).
- Professional credentials include Qualified patent professional (INPA 4580), advocate enrolled with Karnataka Bar, and certified Data Privacy Lead Assessor.
- Industry and education experience includes in the past few years, with a team of 25 people, I have been part of patent and IP work (over 1,500 files), supported 50+ startups (from incorporation to funding up to a total of 100 Cr, in which about 40L is for students and non-dilution), and facilitated 50+ workshops, mostly focused on practical issues like funding structures, compliance, and alternative dispute resolution.
- Teaching experiences are as a visiting faculty for IP/technology law at RV University, guest lecturer at SMVITM for Research Methodology and IP, and workshop facilitator (MAHE and others), totalling about 1,000 teaching hours.

Value to TAPMI and Its Students

- I aim to offer students first-hand insights drawn from live cases and real issues faced by startups and businesses, along with working with students to facilitate grants.

info@lextria.in

- Modules will emphasize best practices and problem-solving, providing a practical bridge between technical, legal, and financial considerations.

Sample Elective Plans

Week	Focus	Topics & Activities
1	IP & Business Law Essentials	Legal basics, company law, contracts, startup setup, IP mapping
2	Licensing & Commercialization	Patent/tech licensing, NDAs, valuation, case review
3	Funding & Compliance	Funding types, due diligence, data/privacy, startup audit
4	Dispute Resolution & Governance	ADR approaches, negotiation exercises, governance basics

If needed, a longer 8-week version is possible for more depth and allow additional casework.

Next Steps

I am open to suggestions from TAPMI on how best to tailor the modules and integrate with the curriculum. My aim is to help students connect their management studies with practical techno-legal and funding knowledge, working in tandem with the faculty team.

Thank you for your consideration.

Best regards,

Adv. Pranav Bhat
